

Ghasr-Dasht Gardens, Shiraz, Iran

Wednesday, November 14, 2018

Location: Shiraz, Iran

Group ID: Section A, Gardens

Group members:

Yasaman Rahimi

Nastaranossadat Jenabali Jahromi

Fardokht Hadji-Salimi

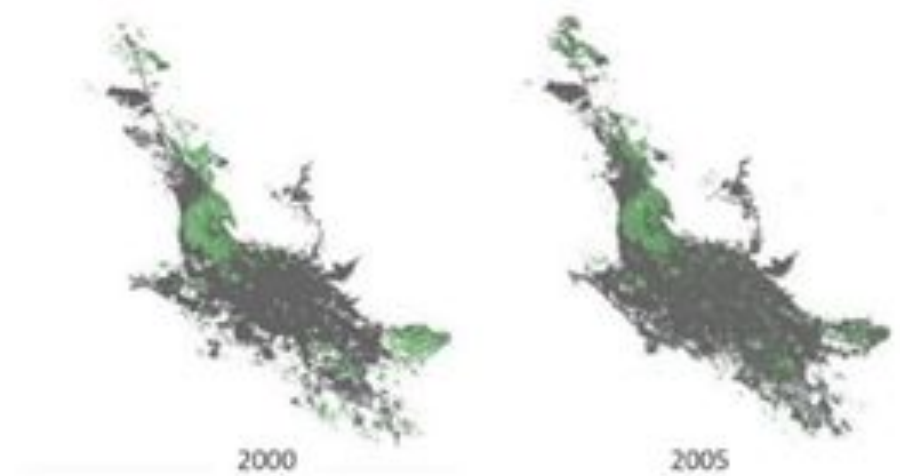

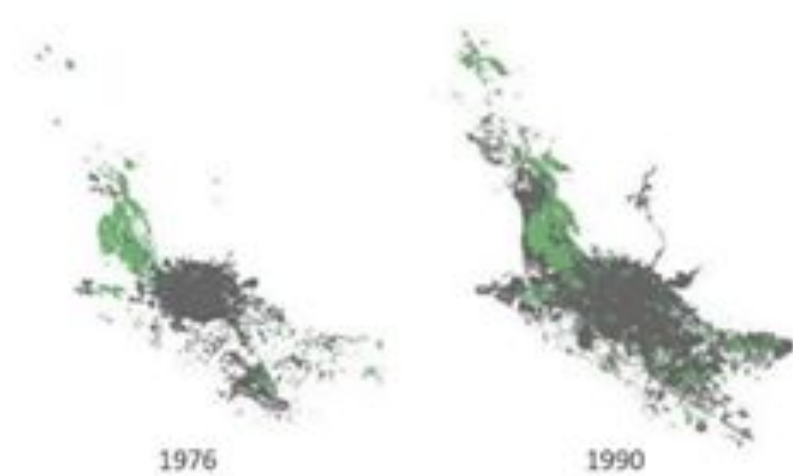

Scope of study:

Location of Shiraz in Iran,

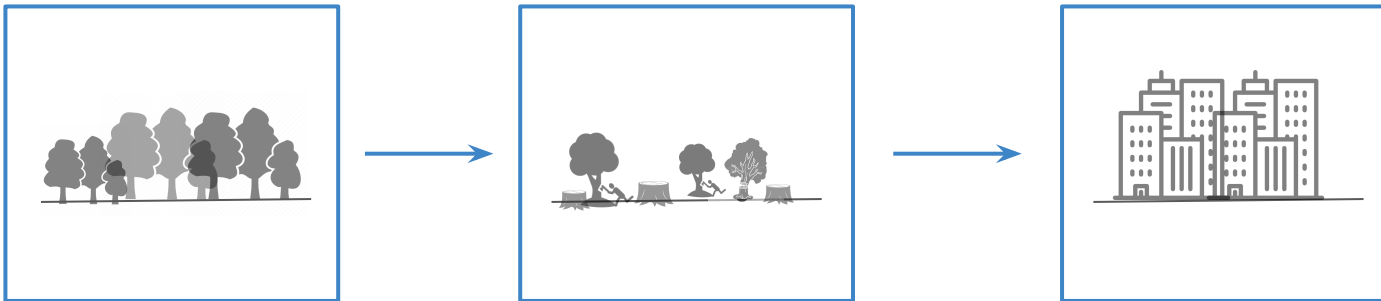

The location of the case study site plan. Shiraz, Iran.

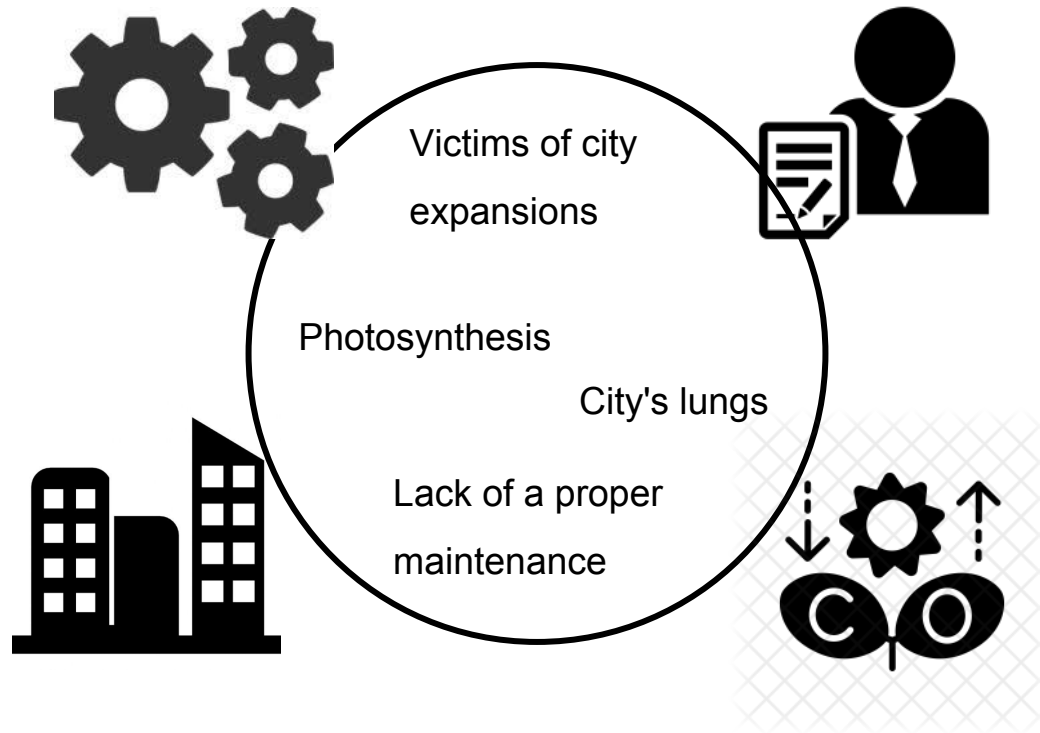

Why is this case relevant?

- Ghasrdasht gardens are one of the last green portion in the city
- *In current situation, most of the gardens in the area are being neglected ,unproductive and unusable.*
- *the characteristics of land cover are changing and ecological structure of the land is transforming*
- —————> **it's a big challenge to propose a feasible concept and strategy in order to maintain Ghasrdasht garden.**

Which idea of 'design with nature' guides the design concept of Ghasrdasht Gardens?

The faced challenges for these gardens and the need of finding solutions to save and also strength them are unavoidable. In a way that in case that the current scenario goes on and the maintenance of these gardens completely misses, even more parts of Ghasr-Dasht Gardens will be demolished and be victims of urban development.
